ABOUT ME

Motivated Linux Administrator with hands-on experience in system configuration, user and permission management, and fundamental networking concepts. Proficient in Linux command-line operations, basic shell scripting, and routine server maintenance. A fast learner with a strong interest in IT infrastructure, system reliability, and open-source technologies

TECHNICAL SKILLS

- Linux System Administration – Strong hands-on experience with Linux commands, process & disk management, boot processes, package management, and overall server maintenance.
 - Server & Network Management – Skilled in network configuration, DNS, FTP, Exim mail server management, SSL setup, .htaccess configuration, and secure data communication.
 - Security & Hardening – Server hardening, firewalls, SSL, access control, and monitoring.
 - Database & IT Operations – MySQL administration, ticketing, backups, and troubleshooting.
-
